

1805-0003

IN THE SPECIFICATION:

At page 14, replace paragraph 41 with the following rewritten paragraph:

[041] In addition to the capability for controlled shut-off of the master supply line to the building, the system **200** provides additional functions implemented by the auto-dialer receiver **24** and sensing switch **28**. In one aspect of the invention, the sensing switch **28** can ~~constitute~~ be configured to sense a leak condition in the particular utility. It is understood that the sensing switch can actually include a plurality of similar switches, preferably linked in parallel and connected to the transmitter **30**.
